### 2016 HANG TIME RIESLING

All of the grapes used to make this wine come from Mary's Peak Vineyard in Philomath and Equinox Vineyard in Crow Valley (west of Eugene). Riesling is our winemaker Matt's favorite white wine varietal. Hang Time Riesling allowed the fruit to hang longer on the vine than normal to achieve some Noble Rot on the fruit to develop more riper stone fruit flavors. Riesling does well with late harvest by retaining great amounts of acidity. The German call this Riesling style Spätlece which is sweeter than a regular Riesling normally but gives richer more concentrated flavors with lots of acidity to balance out the pallet and not taste sweet.

Production: 64 cases

Retail Price \$18

**Wine Club Price \$14.40**

## Vineyard Update from Matt Compton

2019 growing season started with cool temperatures with lots of rain which lead to budbreak around April 15<sup>th</sup> to 20<sup>th</sup>. I call this normal average time for bud break. The cool and wet weather stuck around into early May and gave us frost damage at many of our vineyards. This is the most damage I have seen in many years for our vineyards. When the primary buds get damaged the secondary buds will come out late and have half as much fruit.

With the wet late winter and spring rain is giving us plenty of moisture in the soil to take us into the growing season. Bloom come around June 15<sup>th</sup> with the 90 plus degree days and made flowing happen fast. As of late June, the temperature has cooled down and hopefully will stay cool into July. With good fruit set it's nice to have cooler temperatures after bloom to give us smaller berries.

We have had some setbacks with the frost but hoping for a calm summer and Fall.
